

DOGE VACCINE

WHITEPAPER V1.09

INTRODUCTION

Doge Vaccine was created to combine earning money and entertainment. The Play to Earn product will help solve this. We have brought together a team of developers, designers and other specialists to make it as fast as possible, more profitable and exciting.

We are built on the Binance Smart Chain to remove the risk of a large price for GAS and instability of the GWEI quantity.

It is our mission to give an opportunity to earn money in a decentralized and fun way.

GAMEPLAY

Choose which side you want to stay on! Doge Vaccine is a play to earn product that will allow you to earn our token by spending time in the game. You need to vaccinate, or fight the vaccine to improve your Doge. Kill zombies to get coins from them or the remaining armor. Participate in online battles with other players, but remember that losing the battle may end up losing some armor that you could potentially sell on our NFT platform.

Build houses and shelters to defend against the invasions of zombies and other players. And also you will have the opportunity to sell and buy almost everything that is in our gameplay.

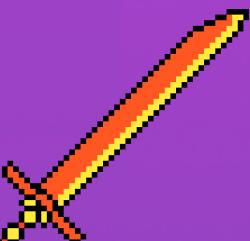

Also , you can improve the level of health, speed and damage of your Doge. That is the best way to make our gameplay fair.

DOGE VACCINE ECOSYSTEM

Our team will develop functionality for the game assets associated with the Doge Vaccine brand. The Doge Vaccine ecosystem must be exciting above all else; only by providing an immersive gaming experience will the ecosystem be able to attract enough participants to add value to the network.

NFT BUILD-IN PLATFORM

Besides the Doge Vaccine game, this is our second main step in building an ecosystem. We will implement NFT progression. This way we will attract more potential buyers and players. Our platform will be used for making trade assets more simple.
